# BLÜCHER® Channel

## The sustainable choice

Based on 40 years experience in the production of stainless steel drainage solutions, BLÜCHER® offers linear drainage systems and kitchen channels to suit any drainage requirement. Especially through three basic characteristics

**HYGIENIC**

**NON-COMBUSTIBLE**

**RECYCLABLE**

## Stainless steel lasts forever

Because of its corrosion and fire resistant properties, as well as its hygienic and environmental advantages, stainless steel is the material of choice for BLÜCHER® Channel.

Stainless steel is 100% recyclable, non-toxic, and its smooth surface guarantees maximum flow capacity, minimum maintenance and the best possible hygiene.

## Standard or customised

The BLÜCHER® Channel program includes a complete range of channels and kitchen channels. From light duty to heavy duty. In acid-resistant AISI 316L or regular AISI 304 stainless steel.

All accessories like gratings, filter baskets and water traps are also part of the standard program.

The BLÜCHER® Channel product program is produced largely from 2 mm stainless steel providing the highest levels of stability and durability. Discharge of liquids at temperatures up to 120 °C will not influence the material.

On our website you will find the complete BLÜCHER® Channel product program as well as selected references and applications.

Our technical experts will assist you in selecting the right solution. Standard or customised.

## Freedom of choice

All products are combinable with the BLÜCHER® Drain range of floor drains for industrial and commercial use.

### Channels and kitchen channels

The channels and kitchen channels are suitable for concrete, tiled, epoxy and flexible sheet floors.

Among the numerous advantages of the BLÜCHER® Channel range are:

- Removable water trap
- 20 mm frame height
- Hygienic frames reinforced with synthetic resin infill
- Filter basket and sand bucket for easy cleaning
- No corners or cavities inside
- Perfect surface finish
- Grating lock system
- Gratings for any load class

### Making the right choice

Our technical experts are always willing to assist you in selecting the right channel for your requirements, based on:

- Water flow
- Waste products
- Weight load
- Floor covering
- Membrane type

## Meets any drainage requirement

The BLÜCHER® Channel range of products fulfills any indoor linear drainage requirement. From IKEA to CocaCola. From Russia to USA.

### Commercial

The excellent hygienic properties with smooth surfaces preventing bacterial growth and blockages make BLÜCHER® Channel the preferred channels and kitchen channels in projects around the world. Accessories like removable water trap, filter baskets and HygienicPro grating ensure easy cleaning and high hygiene. Therefore hospitals, schools, airports, restaurants and other commercial institutions are among our loyal clients.

### Industrial

The food, beverage and pharmaceutical industries value in particular the hygienic and sustainable BLÜCHER® Channel solution. The stainless steel provides a solution, which requires a minimum of maintenance and offers maximum longevity. The long product life expectancy ensures a cost-effective installation, and in AISI 316L steel the channels also provide a durable solution for the chemical industry.
